Reasons for Allowance

The following is an examiner's statement of reasons for allowance:

Applicant's remarks regarding the claims as amended overcome the previous rejections under Kobayashi *et al.* and Balzar *et al.*

Various infant restraining devices in combination with diaper changing mats/stations are known in the art. However, these devices typically attach to an infant by a strap which extends around the infant's body, they do not secure directly to an absorbent article worn by the infant. See e.g., Vickers (US 6,694,552 B1).

Structurally, the closest art of record is Tucker (US 4,989,286). Tucker teaches an infant restraining device that attaches via straps and hook and loop material directly to a diaper-like structure (35) on an infant (see figure 1). However, when the strap is fastened to the diaper-like structure, it would interfere with opening and closing of fastening means of the diaper-like structure because it attaches to the front of the front waistband of the diaper-like structure via the straps.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
